

Billing Software and Services

DIGITECH'S BILLING SOFTWARE

Improved Collections

- Extensive error trapping captures errors prior to billing.
- Improve collections by as much as 25%.
- Flashing comments alert call takers and dispatchers of outstanding payments.

Faster Billing and Payment

- Electronic links to payers speed up billing and payment.
- Automatic procedure coding.
- Batch credit processing.
- Resubmit denials.
- Posting primary payments automatically creates billing to secondary payers.
- Creates and tracks Medicare PCS requirements.
- Paperwork is reduced with electronic billing.

HIPAA Compliancy

- Meets Medicare and Medicaid ANSI 837 electronic specifications and HIPAA transaction standards.
- Provides an accounting of unauthorized uses and disclosures of Protected Health Information (PHI).
- Print and track Notice of Privacy Practices (NPP) and authorization.
- Limit access of PHI to users you specify.

Security Levels

- Limit access of data to users you specify.
- Audit trail documents all actions.

Reduce Staff Hours

- Improved cash flow and automated billing reduces staff hours.

Closing

- Close accounting periods with a simple process and generate reports.

Flexible Reporting

- Quick menu driven, standard reports and user customizable flexible reports.
- Reports easily export to common applications such as MS Excel or Seagate's Crystal Reports.

DIGITECH'S BILLING SERVICES

Digitech's call taking and dispatching software is complimentary with our Billing Services.

- Prior Approval entry
- HCFA statements, private invoicing and facility invoicing
- Denial follow-up and resubmissions
- Notices
- Collections as necessary
- Remittance posting
- Financial reports

How it works

You enter all your trips and dispatch from your server. Digitech accesses the information over a secure Internet connection and processes your claims to completion.
